This list provides a selection of continuing education opportunities that are known to NSGWA and the CEP Committee. It does not provide a list of every opportunity available to a well driller, well digger or pump installer. It is acceptable to obtain CEP points from sources not on this list as long as it pertains to well drilling, well digging or pump installation and is approved by the CEP Committee either before or after the class is taken. This will be updated regularly on our Web site at www.nsgwa.ca (follow the “Legislation” and/or “Upcoming Events” links in the Web site navigation area on the left side of each Web page), and a revised list will be made available at NSGWA regular and regional meetings.
